

NAZEEMA SHAIK

AWS & DevOps Engineer

Hyderabad, Telangana, India | +91-8367075969 | naziya1016@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

DevOps & Cloud Engineer with hands-on project experience in CI/CD automation, containerization, and AWS infrastructure. Skilled in AWS, Kubernetes, Docker, Terraform, and Ansible, with a strong foundation built through self-directed learning and applied project work. Passionate about building scalable, automated, and reliable infrastructure to support software delivery.

EDUCATION

MBA (Pursuing) — JNTU University

B.A. — Ambedkar University, Hyderabad (2026)

Diploma, Electrical & Electronics Engineering (EEE) — Sana Engineering College, Kodad (affiliated with JNTU University) (2018)

Schooling — Saidaiah Concept School, Kodad (2014)

TECHNICAL SKILLS

Cloud: AWS (EC2, VPC, S3, IAM, RDS, EKS, ECS, Lambda, CFT, CloudWatch, CloudTrail); familiarity with Azure and GCP

Containers: Docker, Kubernetes (EKS, ECR, AKS, GKE), Helm, Kustomize, kubectl

CI/CD: Jenkins, GitHub Actions, ArgoCD, AWS CodePipeline/CodeBuild, Maven, Nexus Repository Manager

Infrastructure as Code: Terraform (EC2, VPC, EKS, Lambda, S3), Ansible (Playbooks, Roles, YAML)

Monitoring & Logging: Prometheus, Grafana, Nagios, AWS CloudWatch

Security & Code Quality: SonarQube, Trivy, Ansible Vault

Version Control: Git, GitHub, GitLab

Programming Languages: Python, Shell Scripting

Operating Systems: Red Hat Linux

Databases: MySQL

Productivity Tools: Microsoft Word, Excel, PowerPoint

KEY STRENGTHS

- Solid grounding in DevOps practices spanning automation, configuration management, and cloud services.
- Hands-on exposure to CI using Git, GitHub, Maven, Tomcat, and Jenkins, including configuring daily and nightly build jobs.
- Integrated SonarQube and Nexus with Jenkins for code quality checks and artifact management.
- Comfortable executing builds, troubleshooting failures, and coordinating with development and QA teams.
- Strong problem-solving, adaptability, and communication skills; effective at managing priorities under tight timelines.

PROJECTS

CI/CD Pipeline for an E-Commerce Application (Personal Project)

Tools: Terraform, Jenkins, Ansible, Prometheus, Grafana, Git, SonarQube, AWS

- Built an end-to-end Jenkins CI/CD pipeline to automate build, test, and deployment stages for a sample e-commerce application.
- Provisioned AWS infrastructure (VPC, EC2, S3, RDS, IAM) using Terraform modules.
- Automated application deployment to Tomcat using Ansible playbooks.
- Set up SonarQube for static code analysis and quality gates within the pipeline.
- Built Prometheus and Grafana dashboards to monitor pipeline and infrastructure health.
- Secured credentials using Ansible Vault; configured S3 versioning for artifact storage.

Kubernetes-Based Microservices Deployment (Personal Project)

Tools: Docker, Kubernetes (EKS, Helm, ArgoCD), Terraform, Prometheus, Grafana, AWS

- Provisioned an Amazon EKS cluster using Terraform and deployed a sample microservices architecture.
- Built and pushed Docker images to a private container registry.
- Implemented GitOps-style deployments using Helm charts and ArgoCD.
- Configured Horizontal Pod Autoscaling (HPA), RBAC, namespaces, and resource quotas.
- Monitored cluster health and workload performance using Prometheus and Grafana.
